

# GUIDELINES FOR Leather Jacket Killer

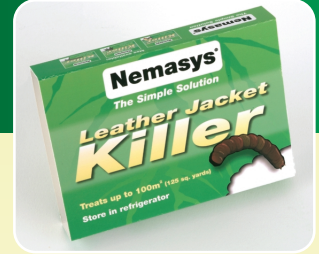

## The Pest:

## The Damage:

## The Solution:

- Apply to moist lawns during late August through to the end of October. This is when the leatherjackets are active and the temperature is above 12°C (54°F).
- When you start to see the adult crane fly (daddy-longlegs) in your garden (towards the end of August) you will know that in a few days they will be laying eggs. These will hatch quickly, so aim to apply two weeks after you see the adults
- The nematodes need to be washed well in so that they reach the roots where the leatherjackets will be.
- The nematodes (*Steinernema feltiae*) seek out the leatherjackets and attack the pest killing it within two to three weeks
- One application will provide control for leatherjackets already present in the soil.
- Ground must be moist before application. Avoid applications in bright sunlight. Apply during evenings or dull conditions.
- Make sure the lawn does not dry out after applying nematodes and keep it well watered for at least two weeks.
- Refrigerate upon receipt and use before the expiry date. Use entire pack at one time and do not store made up solutions.
- Apply Nemasys using a watering can or a garden feeder.  
Just Green recommends the Miracle Gro® or Phostrogen® garden feeders.

(Note: Miracle Gro is a registered trademark of The Scotts Company, and Phostrogen is registered trademark of PBI Ltd)

## COVERAGE

Nemasys Leather Jacket Killer 500m<sup>2</sup>

Nemasys Leather Jacket Killer 100m<sup>2</sup>

## INSTRUCTIONS FOR APPLYING NEMASYS LEATHER JACKET KILLER (100M<sup>2</sup> PACK)

- Add pack contents to 5 litres (10 pints) of water. Stir to break up any lumps.
- Take 0.5 litre (1 pint) of the mix, add to an 8 litre (2 gallon) watering can/sprayer and fill with clean water.
- Using a coarse rose/nozzle apply to up to 10m<sup>2</sup> (12.5 sq yds) of soil. Immediately after application water the area extensively and keep watering for at least two weeks. The pack fills 10 watering cans/sprayers to treat a total of 100m<sup>2</sup> (125 sq yds). Stir the bucket before taking each 0.5 litre (1 pint).
