

# GUIDELINES FOR Vine Weevil Killer

## The Pest:

## The Damage:

## The Solution:

This new nematode (*Steinernema kraussei*) is effective at lower temperatures (down to 5°C/41°F soil temperature), which means it gives more persistent control over a longer period.

For a serious infestation treat in the spring (March to May) and again in the autumn (August to November). To keep a minor problem at bay, one autumn treatment should be adequate.

- Soil or compost must be moist before and for at least two weeks after application. Avoid applications in bright sunlight, apply during evenings or dull conditions.
- Nemasys Vine Weevil Killer will kill larvae present in the area within two to three weeks.
- Indoors, Vine Weevil can be controlled year round.
- Refrigerate upon receipt and use before the expiry date. Use entire pack at one time and do not store made up solutions.
- Apply Nemasys using a watering can or, on open ground a garden feeder. Just Green recommends the Miracle Gro® or Phostrogen® garden feeders.

(Note: Miracle Gro is a registered trademark of The Scotts Company, and Phostrogen is registered trademark of PBI Ltd)

## COVERAGE

Nemasys Vine Weevil Killer 12m<sup>2</sup>

Nemasys Vine Weevil Killer 100m<sup>2</sup>

## INSTRUCTIONS FOR APPLYING NEMASYS VINE WEEVIL KILLER (12m<sup>2</sup> PACK)

- Add pack contents to 4 litres (1 gallon) of water
- Stir to break up any lumps.
- Take 1 litre (2 pints) of the mix, add to an 8 litre (2 gallon) watering can/sprayer and fill with clean water.
- Using a coarse rose/nozzle apply to up to 12m<sup>2</sup> (14 sq yds) of soil, or 160 pots (40 x 30cm) and water in with the equivalent amount of clean water
- The pack fills 4 watering cans/sprayers to treat a total of 12m<sup>2</sup> (14 sq yds). Stir the bucket before taking each 1 litre (2 pints).
- For convenience, if you only have 40 or less pots to treat add the mix in one watering can full. It is impossible to overdose!
